

How to install fonts in order to customize your printables:

Windows XP

1. On the Start menu, click Control Panel.
2. In the Control Panel, double-click Fonts.
3. On the File menu, click Install New Font.
4. Navigate to where you downloaded your files and unzipped your files
5. Navigate to the folder called either summerflower or shavuosflower which will be where your printables you downloaded are located
6. Click on the fonts you want to add
7. Click OK.
8. Your fonts are installed

Windows Vista and Windows 7

1. Navigate to where you downloaded your files and unzipped your files
2. Navigate to the folder called either summerflower or shavuosflower which will be where your printables you downloaded are located
3. Open Fonts folder that is there
4. Select all the fonts listed there by press on CTRL+A (CMD+A on a Mac)
5. Right click with your mouse and choose install.
6. Your fonts are installed

Once your fonts are installed, you can open up your printables and customize them in Adobe Acrobat, by clicking on the light blue areas. It is preformatted with the correct color and font.
